Members

Dribl has been “rolled over” from the 2023 season. The system has generated the same team names in respective age groups, divisions, group and gender but without players.

Clubs can delete any team that they are not using (or if duplicated in some cases) or edit a team or create a new team. For the purposes of club initial grading, for competition, clubs can nominate their preferred division and FSC will adjust divisions once team nominations and FSC grading have been completed.

Please ensure that the gender is correctly selected for your teams as follows:

- Female competitions – gender is set as female.
- Junior Boys/Mixed (6 to 18) gender is set as mixed.
- Men’s Competitions – gender is set as male.

Please follow this guide when creating/editing teams in Dribl.

If there are 2 or more teams in the same age group AND division then distinguish the teams in “GROUP.”
For example – In Community League Uni has Bomb Brewers and Spurs.

Allocating Players

Players are to be allocated to one team only.

For Men's PL Competitions, Men's Community All Age Competitions, Women's PL competition:

Please allocate players to the grade that they would most likely play each week.

We will be setting rules about player "borrowing" to allow players to be selected for the round, particularly in first and second grade.

For those teams who know their player's shirt number, you can also use the team mapper to put this into the system.
